

The listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (Currently Amended) A method for conducting a wagering game as a primary game and an associated progressive jackpot for a secondary game that is different than the primary game, comprising:

receiving a deposit of an amount of a medium of currency by a player at a gaming unit;

receiving input for a player's wager on an occurrence of the wagering game at an input device of the gaming unit;

subtracting the amount of the player's wager on the occurrence of the wagering game from the player's available credit at the gaming unit in response to receiving the input for the player's wager on the primary game, wherein the player's available credit corresponds to the amount of the medium of currency deposited at the gaming unit;

comparing the amount of the player's wager on the occurrence of the wagering game to a minimum wager amount;

subtracting a progressive jackpot wager amount from one of the player's available credit and the credits subtracted from the player's available credit if the player's wager on the primary game is greater than or equal to a minimum wager amount;

adding the progressive jackpot wager amount to a progressive jackpot pool for the progressive jackpot if the player's wager on the primary game is greater than or equal to a minimum wager amount;

determining an outcome for the player for the occurrence of the wagering game;  
and

awarding at least a portion of the progressive jackpot pool to the player if the player's outcome for the occurrence of the wagering game for the primary game is a predetermined progressive jackpot winning outcome for the secondary game and the player's wager is greater than or equal to the minimum wager amount; and

wherein the wagering game is a multi-player wagering game, wherein each player has a unique game array of game indicia for the occurrence of the wagering game and individual game indicia are sequentially selected from the range of game

indicia, wherein one of the players wins the occurrence of the wagering game by matching a predetermined game winning pattern of game indicia on the player's unique game array with the sequentially selected game indicia, and wherein the outcome of the occurrence of the wagering game is a predetermined progressive jackpot winning outcome if a pattern on the player's unique game array formed by game indicia on the unique game array matching sequentially selected game indicia matches a predetermined progressive jackpot winning pattern.

2. (Canceled)

3. (Currently Amended) A method for conducting a wagering game and an associated progressive jackpot in accordance with claim [[2]] 1, wherein the outcome of the occurrence of the wagering game is a predetermined progressive jackpot winning outcome if the player matches the predetermined progressive jackpot winning outcome within a predetermined maximum number of sequentially selected game indicia.

4. (Original) A method for conducting a wagering game and associated progressive jackpot in accordance with claim 1, comprising subtracting the progressive jackpot wager amount from the player's available credit.

5. (Original) A method for conducting a wagering game and associated progressive jackpot in accordance with claim 1, comprising subtracting the progressive jackpot wager amount from the credits subtracted from the player's available credit.

6. (Original) A method for conducting a wagering game and associated progressive jackpot in accordance with claim 1, wherein the progressive jackpot wager amount is equal to a predetermined fixed wager amount.

7. (Original) A method for conducting a wagering game and associated progressive jackpot in accordance with claim 1, wherein the progressive jackpot wager amount is equal to a predetermined percentage of the player's wager for the occurrence of the wagering game.

8. (Original) A method for conducting a wagering game and associated progressive jackpot in accordance with claim 1, comprising displaying graphics corresponding to an outcome of the player's progressive jackpot wager at the gaming unit if the player's wager is greater than or equal to the minimum wager amount.

9. (Original) A method for conducting a wagering game and associated progressive jackpot in accordance with claim 1, wherein the minimum wager amount is equal to the maximum wager that the player may make for an occurrence of the wagering game.

10. (Currently Amended) A method for conducting a wagering game for a first game and an associated progressive jackpot for a second game that is different than the first game, comprising:

~~providing a currency-accepting mechanism at a gaming unit for receiving a deposit of an amount of a medium of currency at a gaming unit;~~

providing an input device for receiving input for a player's wager on an occurrence of the wagering game at the gaming unit;

configuring the gaming unit to subtract the amount of the player's wager on the occurrence of the wagering game from the player's available credit at the gaming unit in response to receiving the input for the player's wager on the primary game at the input device, wherein the player's available credit corresponds to the amount of the medium of currency deposited at the gaming unit;

configuring the gaming unit to compare the amount of the player's wager on the occurrence of the wagering game to a minimum wager amount;

configuring the gaming unit to subtract a progressive jackpot wager amount from one of the player's available credit and the credits subtracted from the player's available credit if the player's wager on the first game is greater than or equal to a minimum wager amount;

configuring the gaming unit to add the progressive jackpot wager amount to a progressive jackpot pool for the progressive jackpot;

configuring the gaming unit to determine an outcome for the player for the occurrence of the wagering game; ~~and~~

configuring the gaming unit to award at least a portion of the progressive jackpot pool for the second game to the player if the player's outcome for the occurrence of the wagering game for the first game is a predetermined progressive jackpot winning

outcome and the player's wager is greater than or equal to the minimum wager amount;  
and

wherein the wagering game is a multi-player wagering game, wherein each player has a unique game array of game indicia for the occurrence of the wagering game and individual game indicia are sequentially selected from a range of available game indicia, wherein one of the players wins the occurrence of the wagering game by matching a predetermined game winning pattern of game indicia on the player's unique game array with the sequentially selected game indicia, and wherein the outcome of the occurrence of the wagering game is a predetermined progressive jackpot winning outcome if a pattern on the player's unique game array formed by game indicia on the unique game array matching sequentially selected game indicia matches a predetermined progressive jackpot winning pattern

11. (Canceled)

12. (Currently Amended) A method for conducting a wagering game and an associated progressive jackpot in accordance with claim [[11]] 10, wherein the outcome of the occurrence of the wagering game is a predetermined progressive jackpot winning outcome if the player matches the predetermined progressive jackpot winning outcome within a predetermined maximum number of sequentially selected game indicia.

13. (Original) A method for conducting a wagering game and associated progressive jackpot in accordance with claim 10, comprising configuring the gaming unit to subtract the progressive jackpot wager amount from the player's available credit.

14. (Original) A method for conducting a wagering game and associated progressive jackpot in accordance with claim 10, comprising configuring the gaming unit to subtract the progressive jackpot wager amount from the credits subtracted from the player's available credit.

15. (Original) A method for conducting a wagering game and associated progressive jackpot in accordance with claim 10, wherein the progressive jackpot wager amount is equal to a predetermined fixed wager amount.

16. (Original) A method for conducting a wagering game and associated progressive jackpot in accordance with claim 10, wherein the progressive jackpot wager amount is equal to a predetermined percentage of the player's wager for the occurrence of the wagering game.

17. (Original) A method for conducting a wagering game and associated progressive jackpot in accordance with claim 10, comprising configuring the gaming device to display graphics corresponding to an outcome of the player's progressive jackpot wager at the gaming unit if the player's wager is greater than or equal to the minimum wager amount.

18. (Original) A method for conducting a wagering game and associated progressive jackpot in accordance with claim 10, wherein the minimum wager amount is equal to the maximum wager that the player may make for an occurrence of the wagering game.

19. (Currently Amended) A method for conducting a wagering game as a primary game and an associated progressive jackpot for a secondary game that is different than the primary game, comprising:

~~receiving a deposit of an amount of a medium of currency by a player at a gaming unit;~~

receiving input for a player's wager on an occurrence of the wagering game at an input device of the gaming unit;

subtracting the amount of the player's wager on the occurrence of the wagering game from the player's available credit at the gaming unit in response to receiving the input for the player's wager on the primary game, wherein the player's available credit corresponds to the amount of the medium of currency deposited at the gaming unit;

receiving input for a player's progressive jackpot wager for the occurrence of the wagering game at the input device of the gaming unit;

subtracting the amount of the player's progressive jackpot wager on the primary game for the occurrence of the wagering game from the player's available credit at the gaming unit in response to receiving the input for the player's progressive jackpot wager;

adding the progressive jackpot wager amount to a progressive jackpot pool for the progressive jackpot if the progressive jackpot wager amount is subtracted from the player's available credit;

determining an outcome for the player for the occurrence of the wagering game;  
and

awarding at least a portion of the progressive jackpot pool to the player if the player's outcome for the occurrence of the wagering game for the primary game is a predetermined progressive jackpot winning outcome for the secondary game and the player input a progressive jackpot wager; and

wherein the wagering game is a multi-player wagering game, wherein each player has a unique game array of game indicia for the occurrence of the wagering game and individual game indicia are sequentially selected from a range of available game indicia, wherein one of the players wins the occurrence of the wagering game by matching a predetermined game winning pattern of game indicia on the player's unique game array with the sequentially selected game indicia, and wherein the outcome of the occurrence of the wagering game is a predetermined progressive jackpot winning outcome if a pattern on the player's unique game array formed by game indicia on the unique game array matching sequentially selected game indicia matches a predetermined progressive jackpot winning pattern.

20. (Canceled)

21. (Currently Amended) A method for conducting a wagering game and an associated progressive jackpot in accordance with claim [[20]] 19, wherein the outcome of the occurrence of the wagering game is a predetermined progressive jackpot winning outcome if the player matches the predetermined progressive jackpot winning outcome within a predetermined maximum number of sequentially selected game indicia.

22. (Original) A method for conducting a wagering game and associated progressive jackpot in accordance with claim 19, wherein the progressive jackpot wager amount is equal to a predetermined fixed wager amount.

23. (Original) A method for conducting a wagering game and associated progressive jackpot in accordance with claim 19, wherein the progressive jackpot wager amount is

equal to a predetermined percentage of the player's wager for the occurrence of the wagering game.

24. (Original) A method for conducting a wagering game and associated progressive jackpot in accordance with claim 19, comprising displaying graphics corresponding to an outcome of the player's progressive jackpot wager at the gaming unit if the player input a progressive jackpot wager.

25. (Original) A method for conducting a wagering game and associated progressive jackpot in accordance with claim 19, wherein the minimum wager amount is equal to the maximum wager that the player may make for an occurrence of the wagering game.

26. (Currently Amended) A method for conducting a wagering game as a primary game and an associated progressive jackpot for a secondary game that is different than the primary game, comprising:

~~providing a currency-accepting mechanism at a gaming unit for receiving a deposit of an amount of a medium of currency at a gaming unit;~~

providing an input device for receiving input for a player's wager on an occurrence of the wagering game at the gaming unit;

configuring the gaming unit to subtract the amount of the player's wager on the occurrence of the wagering game from the player's available credit at the gaming unit in response to receiving the input for the player's wager on the primary game at the input device, wherein the player's available credit corresponds to the amount of the medium of currency deposited at the gaming unit;

configuring the input device for receiving input for a player's progressive jackpot wager for the occurrence of the wagering game at the gaming unit;

configuring the gaming unit to subtract the amount of the player's progressive jackpot wager on the primary game for the occurrence of the wagering game from the player's available credit at the gaming unit in response to receiving input for the player's progressive jackpot wager;

configuring the gaming unit to add the progressive jackpot wager amount to a progressive jackpot pool for the progressive jackpot if the progressive jackpot wager amount is subtracted from the player's available credit;

configuring the gaming unit to determine an outcome for the player for the occurrence of the wagering game; and

configuring the gaming unit to award at least a portion of the progressive jackpot pool to the player if the player's outcome for the occurrence of the wagering game for the primary game is a predetermined progressive jackpot winning outcome for the secondary game and the player inputs a progressive jackpot wager; and

wherein the wagering game is a multi-player wagering game, wherein each player has a unique game array of game indicia for the occurrence of the wagering game and individual game indicia are sequentially selected from a range of available game indicia, wherein one of the players wins the occurrence of the wagering game by matching a predetermined game winning pattern of game indicia on the player's unique game array with the sequentially selected game indicia, and wherein the outcome of the occurrence of the wagering game is a predetermined progressive jackpot winning outcome if a pattern on the player's unique game array formed by game indicia on the unique game array matching sequentially selected game indicia matches a predetermined progressive jackpot winning pattern.

27. (Canceled)

28. (Currently Amended) A method for conducting a wagering game and an associated progressive jackpot in accordance with claim [[27]] 26, wherein the outcome of the occurrence of the wagering game is a predetermined progressive jackpot winning outcome if the player matches the predetermined progressive jackpot winning outcome within a predetermined maximum number of sequentially selected game indicia.

29. (Original) A method for conducting a wagering game and associated progressive jackpot in accordance with claim 26, wherein the progressive jackpot wager amount is equal to a predetermined fixed wager amount.

30. (Original) A method for conducting a wagering game and associated progressive jackpot in accordance with claim 26, wherein the progressive jackpot wager amount is equal to a predetermined percentage of the player's wager for the occurrence of the wagering game.

31. (Original) A method for conducting a wagering game and associated progressive jackpot in accordance with claim 26, comprising configuring the gaming device to display graphics corresponding to an outcome of the player's progressive jackpot wager at the gaming unit if the player's wager is greater than or equal to the minimum wager amount.

32. (Original) A method for conducting a wagering game and associated progressive jackpot in accordance with claim 26, wherein the minimum wager amount is equal to the maximum wager that the player may make for an occurrence of the wagering game.

33. (Currently Amended) A gaming unit for conducting a wagering game for a primary game and an associated progressive jackpot for a secondary game in a gaming network having a network computer and a plurality of gaming units, comprising:

- an input device for inputting a plurality of input selections;

- a gaming unit memory device;

- a currency-accepting mechanism that is capable of allowing a player to deposit a medium of currency;

- an output device;

- a value-dispensing mechanism that is capable of dispensing value to the player;

- a gaming unit controller operatively coupled to the input device, the gaming unit memory device, the currency-accepting mechanism, the output device, and the value-dispensing mechanism,

  - the gaming unit controller being programmed to allow the currency-accepting mechanism to accept a deposit of an amount of a medium of currency by a player at the gaming unit,

  - the gaming unit controller being programmed to allow the input device to receive input for a player's wager on an occurrence of the wagering game at the input device,

  - the gaming unit controller being programmed to subtract the amount of the player's wager on the occurrence of the wagering game for the primary game from the player's available credit at the gaming unit in response to receiving the input for the player's wager, wherein the player's available credit corresponds to the amount of the medium of currency deposited at the gaming unit,

the gaming unit controller being programmed to compare the amount of the player's wager on the occurrence of the wagering game to a minimum wager amount,

the gaming unit controller being programmed to subtract a progressive jackpot wager amount for the secondary game from one of the player's available credit and the credits subtracted from the player's available credit in response to determining that the player's wager on the primary game is greater than or equal to the minimum wager amount,

the gaming unit controller being programmed to cause the output device to transmit a message to the network computer to add the progressive jackpot wager amount to a progressive jackpot pool for the progressive jackpot,

the gaming unit controller being programmed to determine an outcome for the player for the occurrence of the wagering game, ~~and~~

the gaming unit controller being programmed to determine whether the player's outcome for the occurrence of the wagering game is a progressive jackpot winning outcome in response to determining that the player's outcome for the occurrence of the wagering game is a predetermined progressive jackpot winning outcome and to determining that the player's wager is greater than or equal to the minimum wager amount; and

wherein the wagering game is a multi-player wagering game, wherein each player has a unique game array of game indicia for the occurrence of the wagering game and individual game indicia are sequentially selected from a range of available game indicia by one of the network computer and a wagering game server of the gaming network, wherein one of the players wins the occurrence of the wagering game by matching a predetermined game winning pattern of game indicia on the player's unique game array with the sequentially selected game indicia, and wherein the outcome of the occurrence of the wagering game is a predetermined progressive jackpot winning outcome if a pattern on the player's unique game array formed by game indicia on the unique game array matching sequentially selected game indicia matches a predetermined progressive jackpot winning pattern.

34. (Canceled)

35. (Currently Amended) A gaming unit for conducting a wagering game and an associated progressive jackpot in accordance with claim ~~[[34]]~~ 33, wherein the outcome of the occurrence of the wagering game is a predetermined progressive jackpot winning outcome if the player matches the predetermined progressive jackpot winning outcome within a predetermined number of sequentially selected game indicia.

36. (Original) A gaming unit for conducting a wagering game and associated progressive jackpot in accordance with claim 33, wherein the gaming unit controller is programmed to subtract the progressive jackpot wager amount from the player's available credit.

37. (Original) A gaming unit for conducting a wagering game and associated progressive jackpot in accordance with claim 33, wherein the gaming unit controller is programmed to subtract the progressive jackpot wager amount from the credits subtracted from the player's available credit.

38. (Original) A gaming unit for conducting a wagering game and associated progressive jackpot in accordance with claim 33, wherein the progressive jackpot wager amount is equal to a predetermined fixed wager amount.

39. (Original) A gaming unit for conducting a wagering game and associated progressive jackpot in accordance with claim 33, wherein the progressive jackpot wager amount is equal to a predetermined percentage of the player's wager amount for the occurrence of the wagering game.

40. (Original) A gaming unit for conducting a wagering game and associated progressive jackpot in accordance with claim 33, comprising a display device operatively coupled to the gaming unit controller, the gaming unit controller being programmed to cause the display device to display graphics corresponding to an outcome of the player's progressive jackpot wager at the gaming unit in response to determining that the player's wager is greater than or equal to the minimum wager amount.

41. (Original) A gaming unit for conducting a wagering game and associated progressive jackpot in accordance with claim 33, wherein the minimum wager amount is equal to the maximum wager that the player may make for an occurrence of the wagering game.

42. (Currently Amended) A gaming unit for conducting a wagering game as a primary game and an associated progressive jackpot for a secondary game that is different than the primary game in a gaming network having a network computer and a plurality of gaming units, comprising:

- an input device for inputting a plurality of input selections;
- a gaming unit memory device;
- a currency-accepting mechanism that is capable of allowing a player to deposit a medium of currency;
- an output device;
- a value-dispensing mechanism that is capable of dispensing value to the player;
- a gaming unit controller operatively coupled to the input device, the gaming unit memory device, the currency-accepting mechanism, the output device, and the value-dispensing mechanism,

- the gaming unit controller being programmed to allow the currency-accepting mechanism to accept a deposit of an amount of a medium of currency by a player at the gaming unit,

- the gaming unit controller being programmed to allow the input device to receive input for a player's wager on an occurrence of the wagering game at the input device,

- the gaming unit controller being programmed to subtract the amount of the player's wager on the occurrence of the wagering game from the player's available credit at the gaming unit in response to receiving the input for the player's wager on the primary game, wherein the player's available credit corresponds to the amount of the medium of currency deposited at the gaming unit,

- the gaming unit controller being programmed to allow the input device to receive input for a player's progressive jackpot wager for the occurrence of the wagering game at the input device of the gaming unit,

the gaming unit controller being programmed to subtract the amount of the player's progressive jackpot wager on the primary game for the occurrence of the wagering game from the player's available credit at the gaming unit in response to receiving the input for the player's progressive jackpot wager,

the gaming unit controller being programmed to cause the output device to transmit a message to the network computer to add the progressive jackpot wager amount to a progressive jackpot pool for the progressive jackpot,

the gaming unit controller being programmed to determine an outcome for the player for the occurrence of the wagering game, ~~and~~

the gaming unit controller being programmed to determine whether the player's outcome for the occurrence of the wagering game for the primary game is a progressive jackpot winning outcome in response to determining that the player's outcome for the occurrence of the wagering game is a predetermined progressive jackpot winning outcome for the secondary game and to receiving the player's input for a progressive jackpot wager at the input device; and

wherein the wagering game is a multi-player wagering game, wherein each player has a unique game array of game indicia for the occurrence of the wagering game and individual game indicia are sequentially selected from a range of available game indicia by one of the network computer and a wagering game server of the gaming network, wherein one of the players wins the occurrence of the wagering game by matching a predetermined game winning pattern of game indicia on the player's unique game array with the sequentially selected game indicia, and wherein the outcome of the occurrence of the wagering game is a predetermined progressive jackpot winning outcome if a pattern on the player's unique game array formed by game indicia on the unique game array matching sequentially selected game indicia matches a predetermined progressive jackpot winning pattern.

43. (Canceled)

44. (Currently Amended) A gaming unit for conducting a wagering game and an associated progressive jackpot in accordance with claim [[43]] 42, wherein the outcome of the occurrence of the wagering game is a predetermined progressive jackpot winning

outcome if the player matches the predetermined progressive jackpot winning outcome within a predetermined number of sequentially selected game indicia.

45. (Original) A gaming unit for conducting a wagering game and associated progressive jackpot in accordance with claim 42, wherein the progressive jackpot wager amount is equal to a predetermined fixed wager amount.

46. (Original) A gaming unit for conducting a wagering game and associated progressive jackpot in accordance with claim 42, wherein the progressive jackpot wager amount is equal to a predetermined percentage of the player's wager amount for the occurrence of the wagering game.

47. (Original) A gaming unit for conducting a wagering game and associated progressive jackpot in accordance with claim 42, comprising a display device operatively coupled to the gaming unit controller, the gaming unit controller being programmed to cause the display device to display graphics corresponding to an outcome of the player's progressive jackpot wager at the gaming unit in response to receiving the player's input for a progressive jackpot wager at the input device.

48. (Original) A gaming unit for conducting a wagering game and associated progressive jackpot in accordance with claim 42, wherein the minimum wager amount is equal to the maximum wager that the player may make for an occurrence of the wagering game.
